

Modular context-based stamp

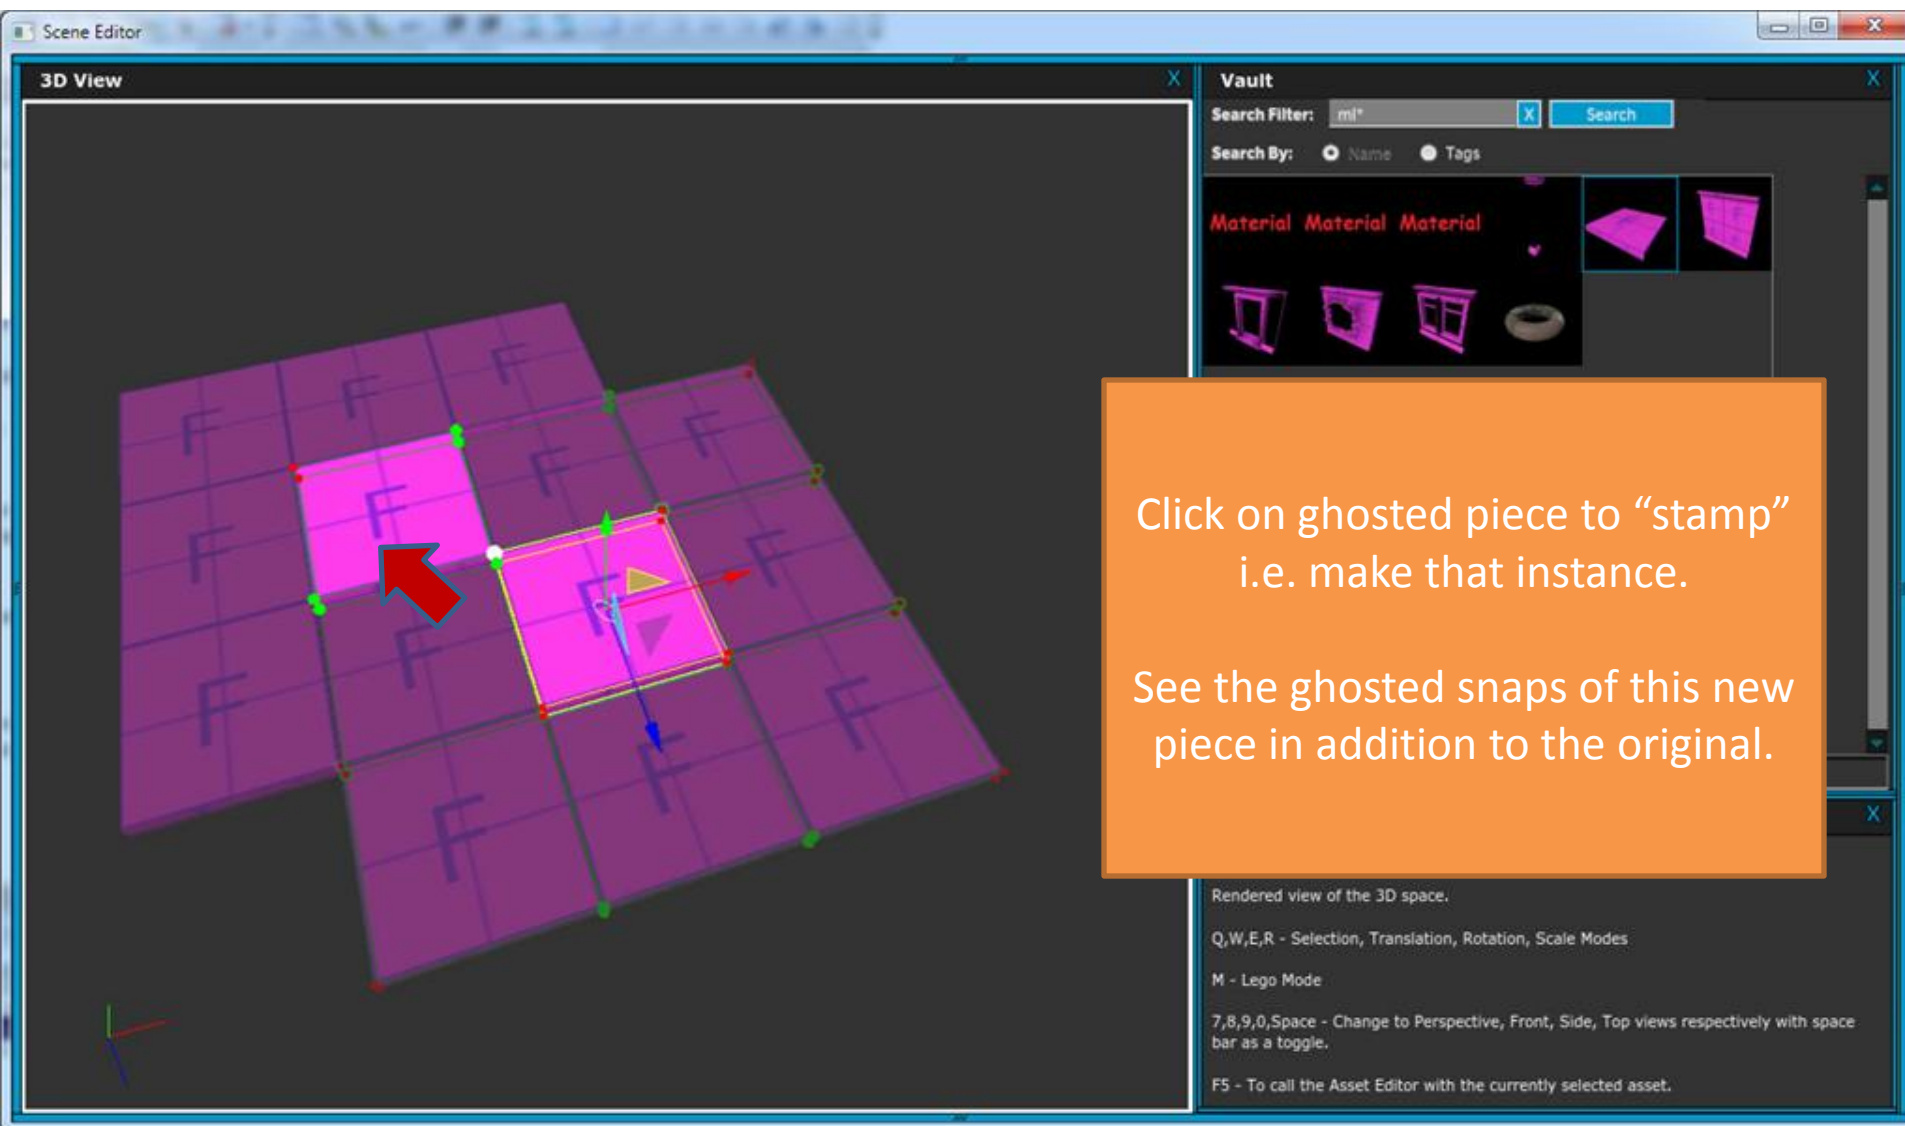

Hit hotkey to "modular stamp mode"

Initially see one set of connections
this floor piece was setup with.
(floor -> wall)

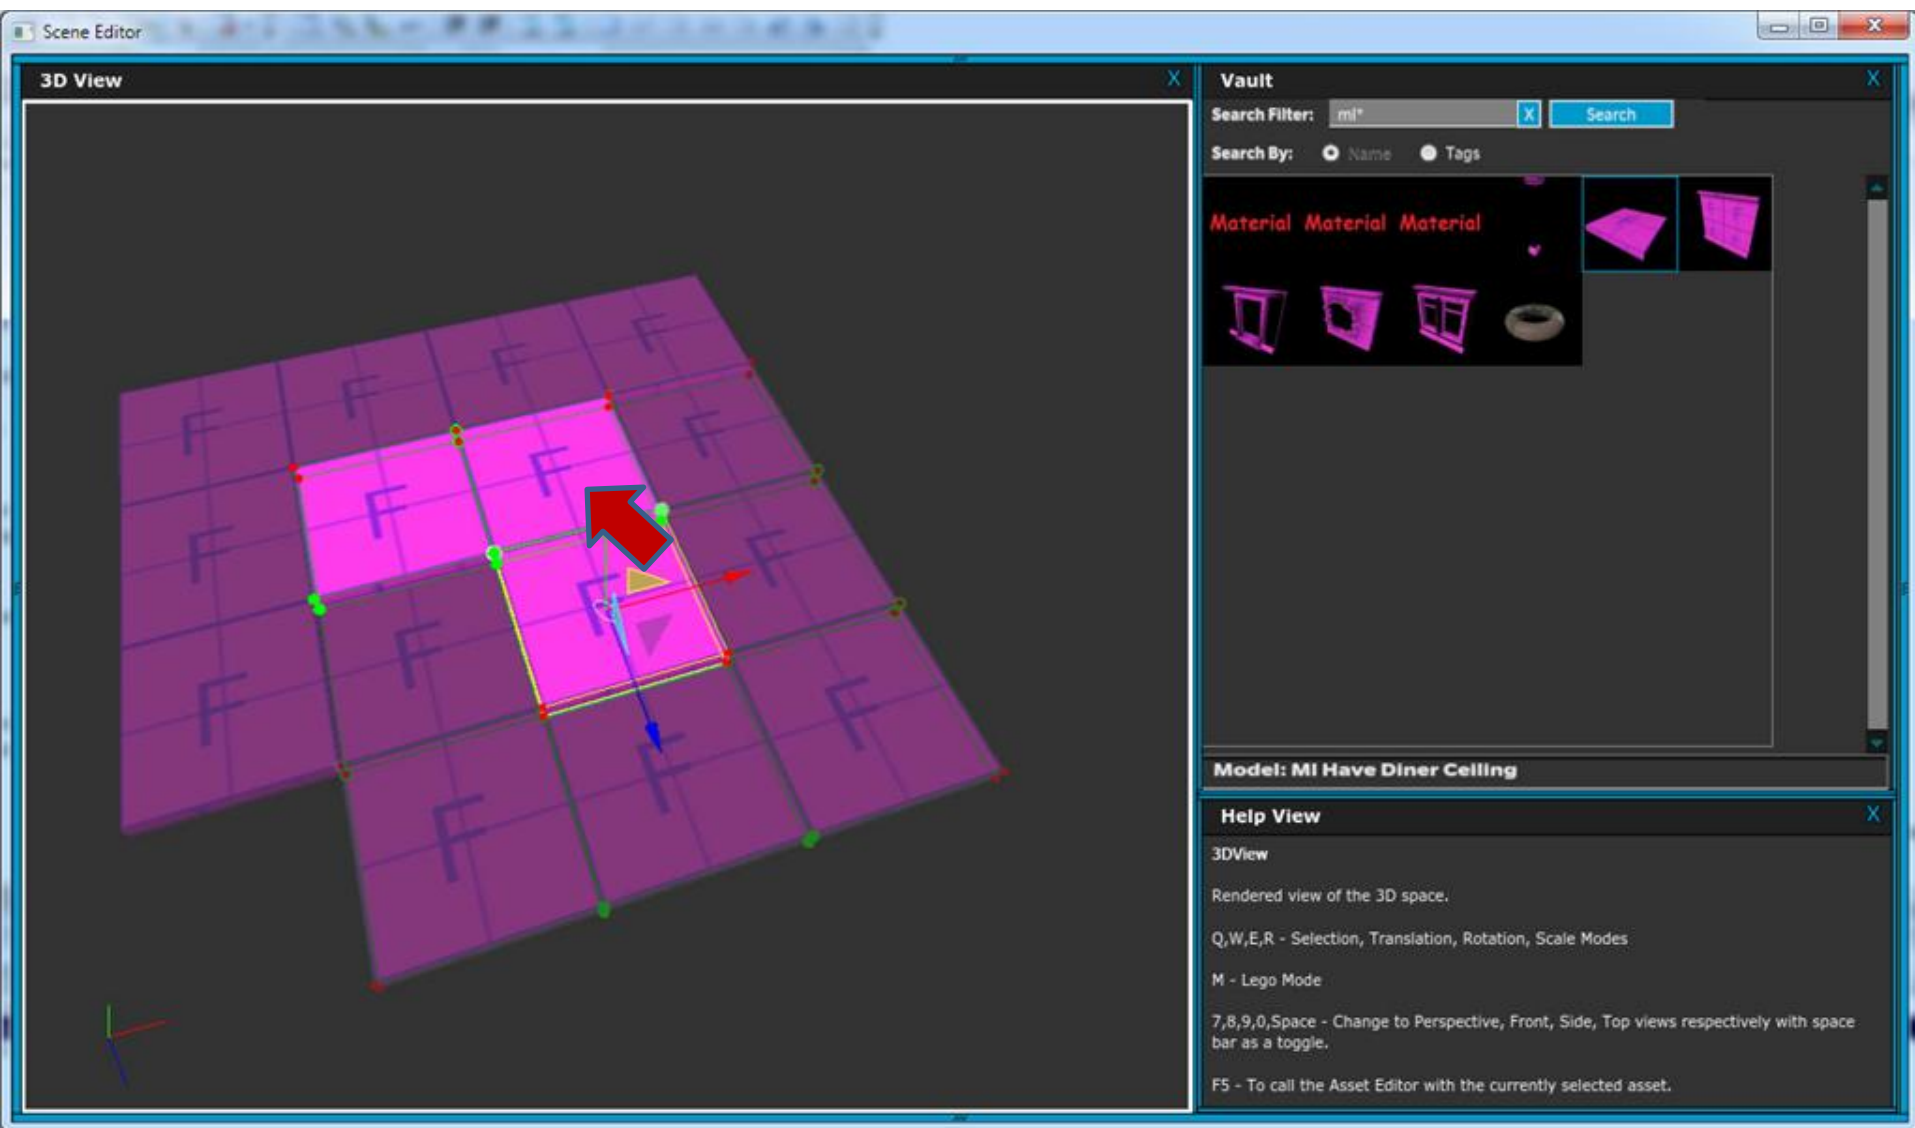

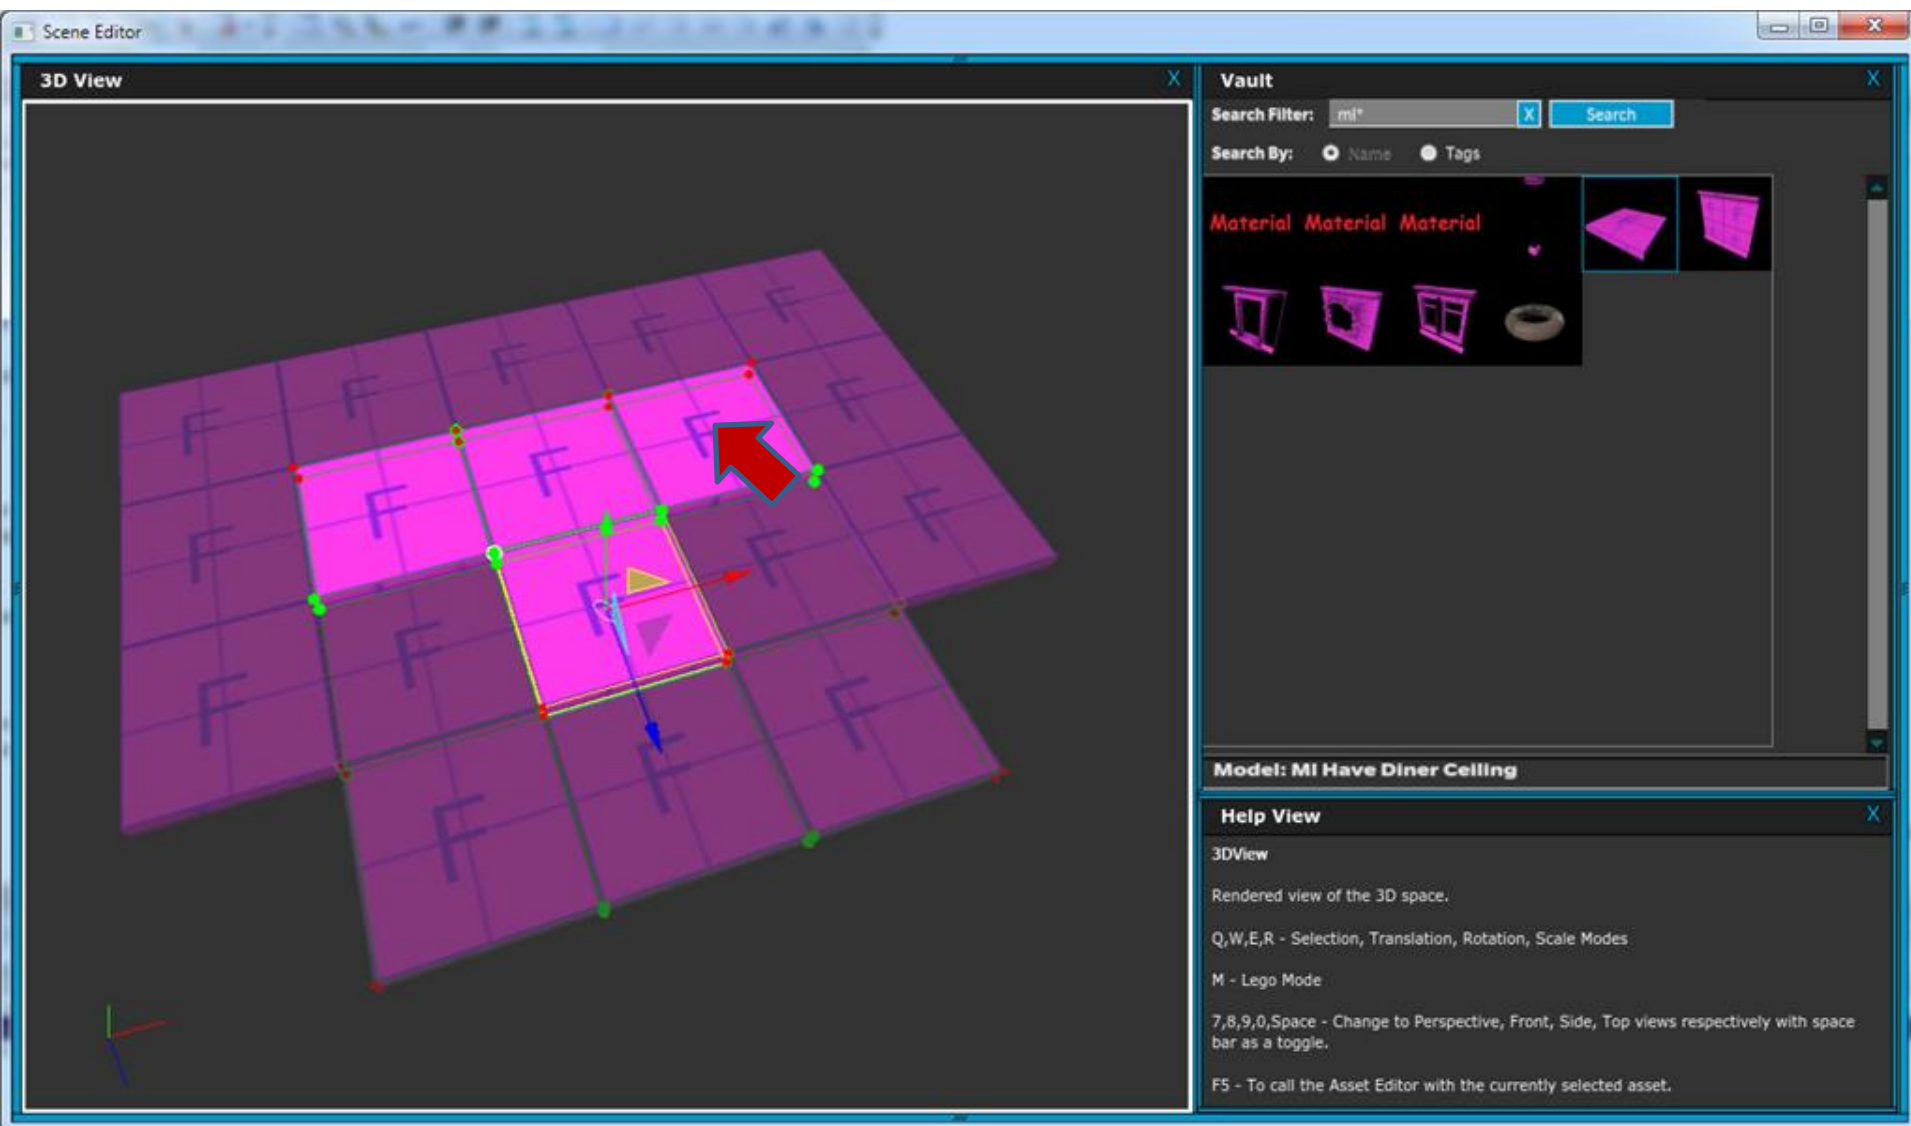

Hit key to tab to the second set of connections the floor piece was setup with
(floor -> floor)

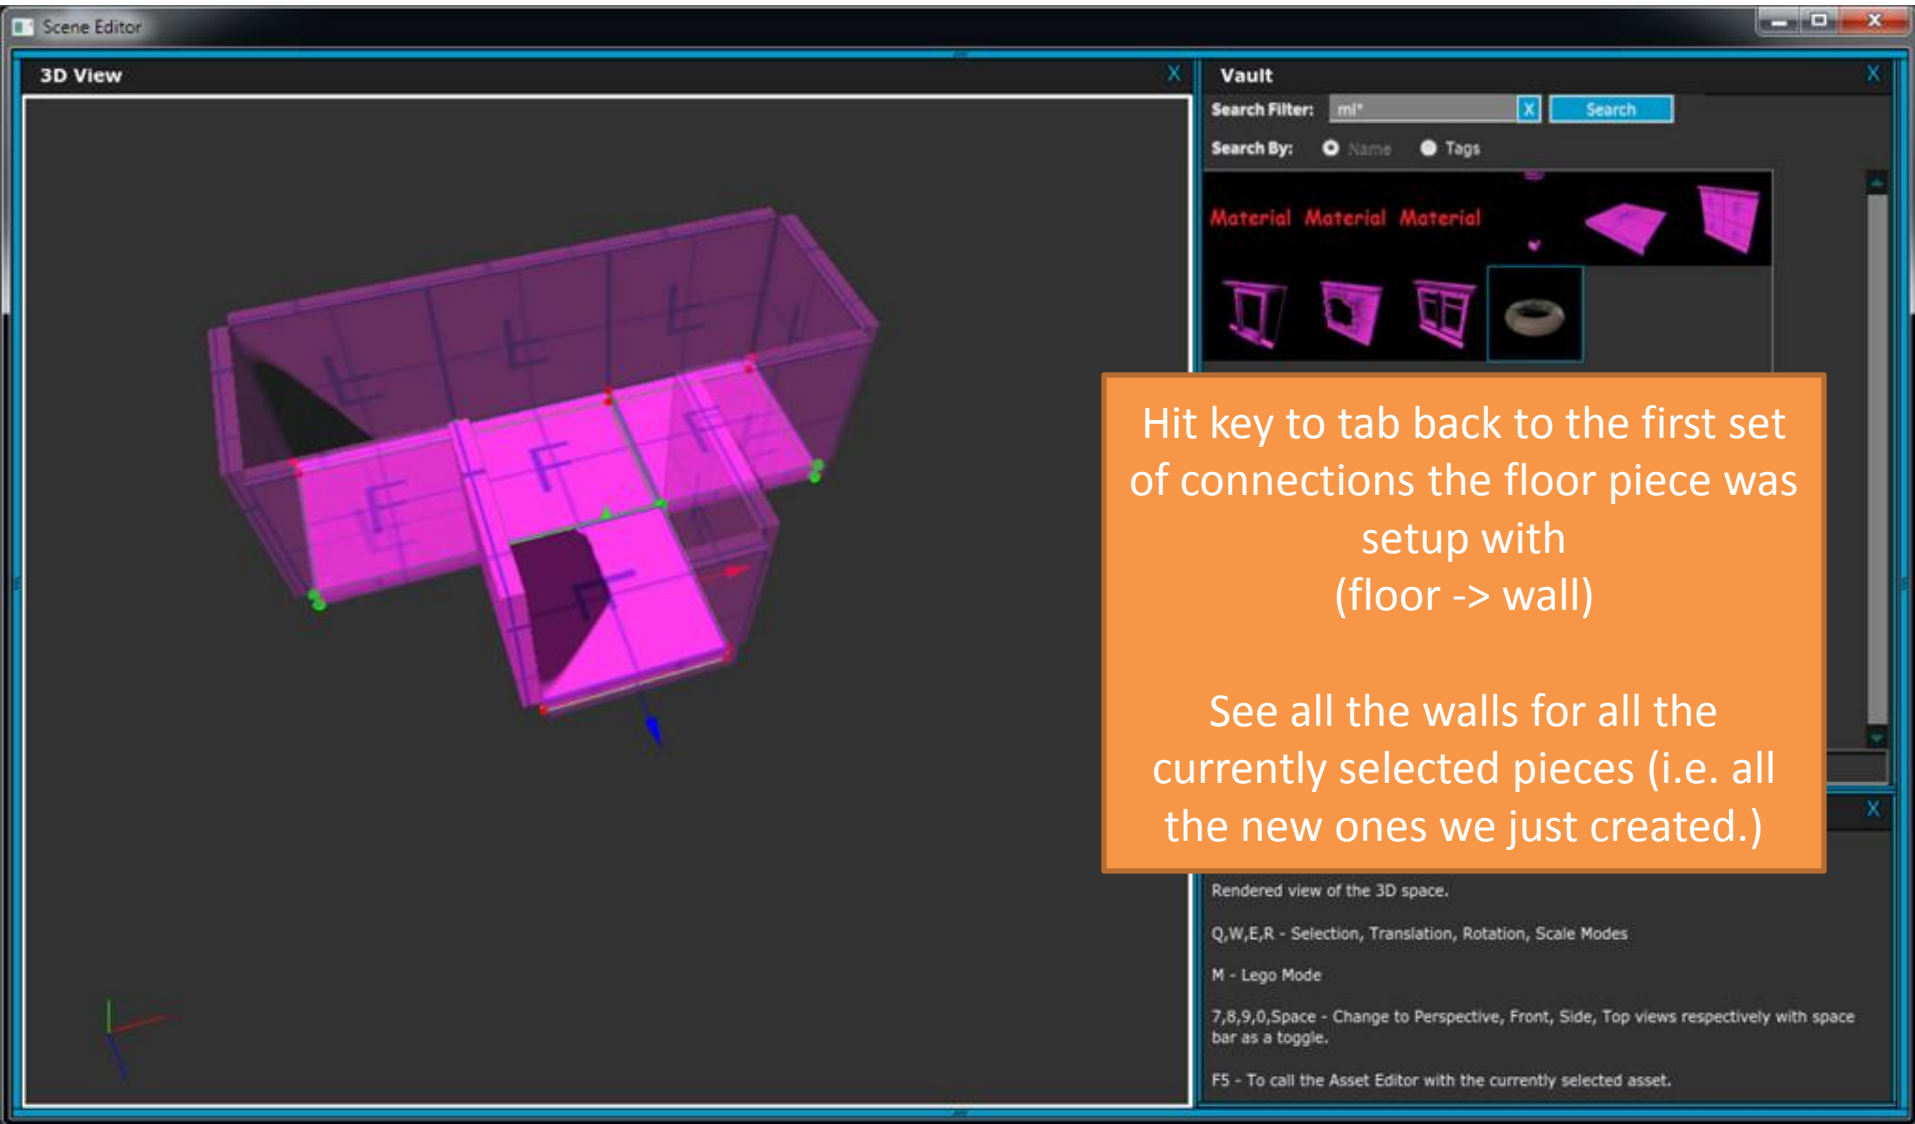

Click on ghosted piece to “stamp”
i.e. make that instance.

See the ghosted snaps of this new
piece in addition to the original.

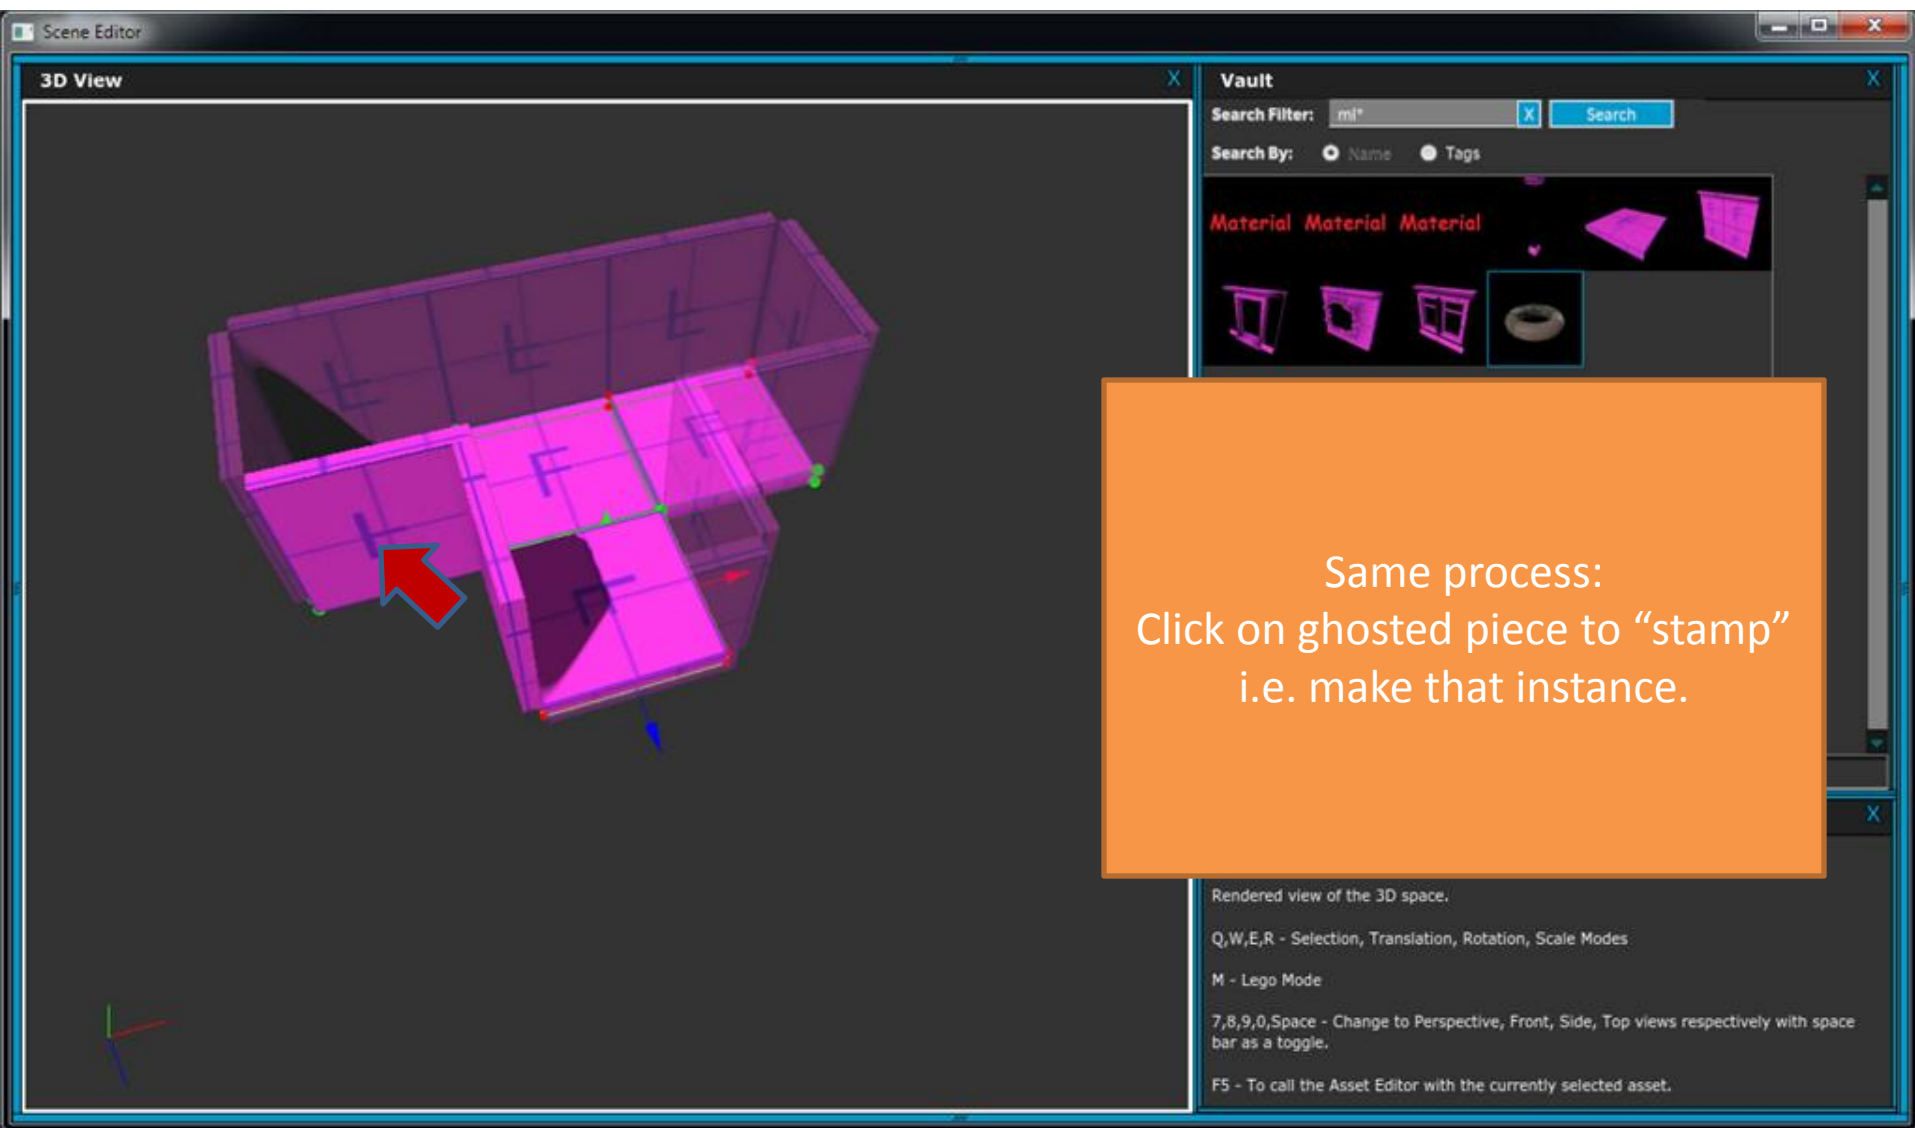

Hit key to tab back to the first set of connections the floor piece was setup with (floor -> wall)

See all the walls for all the currently selected pieces (i.e. all the new ones we just created.)

Same process:
Click on ghosted piece to "stamp"
i.e. make that instance.
